Subsection Sub	Day1 morning	Overview and JWST program updates (9:00-10:30))			
9:30 - 9.45 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 9:45 - 10:00 10:15 - 10:30 9:40 - 2 PIs 10:15 - 10:30 9:40 - 2 PIs 10:15 - 10:30 10:15 - 10:30 9:40 - 2 PIs 10:15 - 10:30 10:15 - 10:30 10:30 10:30 - 11:15 10:30 10:30 - 11:15 10:30 10:30 - 11:15 10:30 10:30 - 11:15 10:30 10:30 - 11:15 10:30 10:30 - 11:15 10:30 - 3 Minghia Yue 10:30 - 3 Minghia Yue 10:30 - 11:15 10:30 - 3 Minghia Yue 10:30 - 3 Minghia 10:30 - 3 Minghia Yue 10:30 - 3 Minghia 10:30 - 3 Minghia 10:3	Tuesday, Oct 3rd	9:00 - 9:15	Xiaohui Fan	Welcome, logistics and briefing on the goal of this workshop		
9.45 - 10.00 Fruderick Davies First Reautile flore glazer First Seautile gl		9:15 - 9:30	Feige Wang	Overview of ASPIRE program and data products		
10:00 - 10:15 Roberto Decaris A quasar-assellite galaxy merger at z=0.2		9:30 - 9:45	Jinyi Yang	Updates from quasar frontier program and ASPIRE quasar sample		
Coeffe (10:30-11:00)		9:45 - 10:00	Frederick Davies	First Results from GO#2073: Towards Reionization Epoch Quasar Light Echoes		
Coeffe (19:39-11:09)		10:00 - 10:15	Roberto Decarli	A quasar-satellite galaxy merger at z=6.2		
Program updates Black holes and their host galaxies (11:00-12:30) 11:00 - 11:15		10:15 - 10:30	Cycle 2 Pls	Approved Cycle 2 program updates		
Program updates Black holes and their host galaxies (11:00-12:30) 11:00 - 11:15						
11:10 - 11:15 Sarah Bosman High-2 Quasars with MRINMS		Coeffe (10:30-11:00)				
11:10 - 11:15 Sarah Bosman High-2 Quasars with MRINMS		Program updates Black holes and their host galaxies (11:00-12:30)				
11:15 - 11:30 Minghao Yue EIGER: Detecting the host galaxies of furminous quasars at z~6 11:30 - 11:45 Meredit Stone Constraint B Sellari Massas of Hight_AGN z~5-7 Quasars 11:45 - 12:00 Weizhe Liu Quasar host galaxy and outflow in the EGR 12:00 - 12:15 Camryn Phillips Extended Emission in z~5 JWSTRNIRSpec quasars 12:15 - 12:30 Mingyu Li Hel 1083m emitting galaxies at cosmic noon Lunch (12:30-14:00)				High-z Quasars with MIRI/MRS		
11:30 - 11:36 Meredith Stone Constraining the Stellar Masses of High-L_AGN z=5-7 Quasars		11:15 - 11:30		EIGER: Detecting the host galaxies of luminous guasars at z>~6		
1145 - 12:00 Weizhe Liu Quasar host galaxy and outflow in the EoR 12:00 - 12:15 Camryn Phillips Extended Emission in z ~6 JWSTN/RESpec quasars 12:15 - 12:30 Mingyu Li Hel 1083mm emitting galaxies at cosmic noon		11:30 - 11:45				
12:15 - 12:30 Mingyu Li Hel 1083mm emitting galaxies at cosmic noon		11:45 - 12:00	Weizhe Liu	5 -		
12:15 - 12:30 Mingyu Li Hel 1083mm emitting galaxies at cosmic noon		12:00 - 12:15	Camryn Phillips	Extended Emission in z~6 JWST/NIRSpec quasars		
13:15 John Adams intro to Biosphere 2 Day1 afternoon Project updates high redshift galaxies, IGM and CGM (14:00-15:30) Tuesday, Oct 3rd 14:00 - 14:15 Jackie Champagne Updates on Characterizing the [OIII] Emitters in ASPIRE Protocluster Candidates 14:51 - 14:30 Zheng Cai Metallicity Properties of Galaxies in EREBUS project 14:30 - 14:45 Joseph Hennawi IGM damping wings with JWST 14:45 - 15:00 Koki Kakiichi Galaxy-IGM cross-correlation from ASPIRE quasar fields 15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00)		12:15 - 12:30	Mingyu Li			
13:15 John Adams intro to Biosphere 2 Day1 afternoon Project updates high redshift galaxies, IGM and CGM (14:00-15:30) Tuesday, Oct 3rd 14:00 - 14:15 Jackie Champagne Updates on Characterizing the [OIII] Emitters in ASPIRE Protocluster Candidates 14:51 - 14:30 Zheng Cai Metallicity Properties of Galaxies in EREBUS project 14:30 - 14:45 Joseph Hennawi IGM damping wings with JWST 14:45 - 15:00 Koki Kakiichi Galaxy-IGM cross-correlation from ASPIRE quasar fields 15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00)			·			
Day1 afternoon Project updates high redshift galaxies, IGM and CGM (14:00-16:30) Tuesday, Oct 3rd 14:00 - 14:15 Jackie Champagne Jupdates on Characterizing the [OIII] Emitters in ASPIRE Protocluster Candidates 14:15 - 14:30 Zheng Cai Metallicity Properties of Galaxies in EREBUS project 14:30 - 14:45 Joseph Hennawi IGM damping wings with JWST 14:45 - 15:00 Koki Kakiichi Galaxy-IGM cross-correlation from ASPIRE quasar fields 15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00) Breakout: project/paper discussions (16:00-18:00) Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator/Joseph Hennawi Coordinator/Joseph Hennawi Coordinator/Joseph Hennawi Coordinator/Joseph Hennawi IGM/CGM group Coordinator/Joseph Hennawi IGM/CGM group Coordinator/Joseph Hennawi IGM/CGM group EREBUS Project Announcements Dinner and discussion (18:30)		Lunch (12:30-14:00)				
Day1 afternoon Project updates - high redshift galaxies, IGM and CGM (14:00-15:30) Tuesday, Oct 3rd 14:00 - 14:15 Jackie Champagne Updates on Characterizing the [OIII] Emitters in ASPIRE Protocluster Candidates 14:15 - 14:30 Zheng Cai Metallicity Properties of Galaxies in EREBUS project 14:30 - 14:45 Joseph Hennawi IGM damping wings with JWST 14:45 - 15:00 Koki Kakiichi Galaxy-IGM cross-correlation from ASPIRE quasar fields 15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Sivei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00) Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator/Joseph Hennawi Coordinator/Joseph Hennawi Coordinator/Joseph Hennawi IGM/CGM group Coordinator/Joseph Hennawi IGM/CGM group Coordinator/Jinyl Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30)		13:15	John Adams	intro to Biosphere 2		
Tuesday, Oct 3rd 14:00 - 14:15 14:30						
14:15 - 14:30 In the standard of the standard	Day1 afternoon	Project updates high redshift galaxies, IGM and	CGM (14:00-15:30)			
14:30 - 14:45 14:45 - 15:00 Koki Kakiichi Galaxy-IGM cross-correlation from ASPIRE quasar fields 15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00) Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Zioseph Hennawi GM/CGM group Coordinator:Joseph Hennawi IGM/CGM group Coordinator:Feige Wang Quasar environment and large-scale structure group EREBUS Project Announcements Dinner and discussion (18:30) Lessons learned from other JWST programs (9:00-10:40)	Tuesday, Oct 3rd	14:00 - 14:15	Jackie Champagne	Updates on Characterizing the [OIII] Emitters in ASPIRE Protocluster Candidates		
14:45 - 15:00 Koki Kakiichi Galaxy-IGM cross-correlation from ASPIRE quasar fields 15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00)		14:15 - 14:30	Zheng Cai	Metallicity Properties of Galaxies in EREBUS project		
15:00 - 15:15 Yunjing Wu Characterizing the Early Cosmic Ecosystems through ALMA and JWST 15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00) Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:/Xiaohui Fan Coordinator:/Siaohui Fan Coordinator:/Siaohui Fan Coordinator:/Seigh Hennawi Coordinator:/Seigh Hennawi Coordinator:/Seigh Hennawi Bli/Most group Coordinator:/Siaohui Fan Coordinat		14:30 - 14:45	Joseph Hennawi	, , ,		
15:15 - 15:30 Siwei Zou Metal enrichment in the CGM at the end of reionization epoch Coeffe (15:30-16:00) Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Xiaohui Fan Galaxy properties and faint AGN group Coordinator:Peige Wang Quasar environment and large-scale structure group BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Lessons learned from other JWST programs (9:00-10:40)		14:45 - 15:00	Koki Kakiichi	Galaxy-IGM cross-correlation from ASPIRE quasar fields		
Coeffe (15:30-16:00) Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Xiaohui Fan Galaxy properties and faint AGN group Coordinator:Joseph Hennawi IGM/CGM group Coordinator:Feige Wang Quasar environment and large-scale structure group Coordinator:Jinyi Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Day2 morning Lessons learned from other JWST programs (9:00-10:40)		15:00 - 15:15	Yunjing Wu	Characterizing the Early Cosmic Ecosystems through ALMA and JWST		
Breakout: project/paper discussions (16:00-18:00) Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Xiaohui Fan Galaxy properties and faint AGN group Coordinator:Joseph Hennawi IGM/CGM group Coordinator:Feige Wang Quasar environment and large-scale structure group Coordinator:Jinyi Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Lessons learned from other JWST programs (9:00-10:40)		15:15 - 15:30	Siwei Zou	Metal enrichment in the CGM at the end of reionization epoch		
Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Xiaohui Fan Galaxy properties and faint AGN group Coordinator:Joseph Hennawi IGM/CGM group Coordinator:Feige Wang Quasar environment and large-scale structure group Coordinator:Jinyi Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Lessons learned from other JWST programs (9:00-10:40)		Coeffe (15:30-16:00)				
Topics: (1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Xiaohui Fan Galaxy properties and faint AGN group Coordinator:Joseph Hennawi IGM/CGM group Coordinator:Feige Wang Quasar environment and large-scale structure group Coordinator:Jinyi Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Lessons learned from other JWST programs (9:00-10:40)		Rreakout: project/paper discussions (16:00-18:00)				
(1) quick updates on status of existing projects, at least for the projects not discussed during the early science sessions; (2) identify any technical issues and challenges, about data and modeling for these projects, which hopefully will allow the group to come up with a few key issues that people can collaboratively work on; (3) ideas of new projects. Coordinator:Feige Wang Coordinator:Jinyi Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Lessons learned from other JWST programs (9:00-10:40)			Coordinator:Xiaohui Fan	Galaxy properties and faint AGN group		
Coordinator: Jinyi Yang BH/host group EREBUS Project Announcements Dinner and discussion (18:30) Day2 morning Lessons learned from other JWST programs (9:00-10:40)			Coordinator:Joseph Hennawi	IGM/CGM group		
Dinner and discussion (18:30) Day2 morning Lessons learned from other JWST programs (9:00-10:40)			Coordinator:Feige Wang	Quasar environment and large-scale structure group		
Dinner and discussion (18:30) Day2 morning Lessons learned from other JWST programs (9:00-10:40)			Coordinator:Jinyi Yang	BH/host group		
Day2 morning Lessons learned from other JWST programs (9:00-10:40)			EREBUS Project Announcements			
Day2 morning Lessons learned from other JWST programs (9:00-10:40)		Dinner and discussion (49:20)				
		Diffice and discussion (10:30)				
	Day2 morning	Lessons learned from other JWST programs (9:0	0-10:40)			
				Evolution of the UVLF at z > 9		

	9:20 - 9:40	Jenny Greene (invited, remote talk)	Little red dots		
	9:40 - 9:55	Jianwei Lyu	AGN selection and demographics: a new age with JWST/MIRI		
	9:55 - 10:10	Ryan Endsley	The rest-optical line properties of z~6-9 Lyman-break galaxies		
			Combining deep NIRCam imaging + grism spectroscopy: results from JADES+FRESCO		
	10:10 - 10:25	Fengwu Sun	and PEARLS+MAGNIF		
	10:25 - 10:40	Gene Leung	Probing obscured AGN at z>6 with MIR imaging		
	Coeffe (10:40-11:00)				
	Followup observations, simulations and synergies (11:00-12:30)				
	11:00 - 11:15	Aklant Kumar Bhowmick	Observational signatures of low mass black hole seeds: Predictions from BRAHMA cosmological simulations		
	11:15 - 11:30	Emanuele Paolo Farina	JWST+MUSE: potential synergies		
	11:30 - 11:45	Raymond Remigio	Probing the Lya halos of the most distant quasars with Keck/KCWI		
	11:45 - 12:15	All (free discussion)	Existing follow-up observations Data reduction tasks Future non-JWST follow-up plans How to follow-up little red dots New simulations		
	12:15 - 12:30	Xiaohui Fan	unofficial thoughts on JWST TAC process		
	Lunch (12:30-14:00)				
Day2 afternoon	Data reduction demo and data chanllenge discussion	n (14:00-15:30)			
Wednesday, Oct 4th	14:00 - 14:30	Weizhe Liu, Jianwei Lyu, Federica Loiacono and Roberto Decarli	NIRSpec/IFU and Q3D		
	14:30 - 15:00	Joseph Hennawi	NIRSpec FSS/MOS and Pypelt		
	15:00 - 15:30	Fengwu Sun	NIRCam WFSS		
	15:30 - 15:50	Jackie Champagne, Feige Wang and Jinyi Yang	Discussion about future data development needs and other data challenge		
	Late afternoon hikes and dinner in town (16:00 -)				
Day3 morning	Review of Cycle 2 programs and Cycle 3 ideas (9:00-	-10:30)			
Thursday, Oct 5th	9:00 - 9:30		Review of Cycle 2 programs		
-	9:30 - 10:30		We will send a Google Form to collect Cycle 3 proposal ideas and plans before the workshop. We will review the submissions during this session. Anyone can briefly discuss or present their ideas and plans, using one or two slides.		
	Coeffe (10:30-11:00)				
	Ideas of Cycle 3 medium-large programs (11:00-12:3	30)			
	11:00 - 12:20		We will send a Google Form to collect Cycle 3 proposal ideas and plans before the workshop. We will review the submissions during this session. Anyone can briefly discuss or present their ideas and plans, using a couple of slides (depends how many programs we could have).		
	12:20 - 12:30		To decide the breakout discussion groups for the afternoon session		
	Lunch (12:30-14:00)				
Day 3 afternoon	Lunch (12:30-14:00)				

Thursday, Oct 5th		Breakout based on discussions in the morning
	Coeffe (15:30-16:00)	
	D	
	Breakout: cycle 3 plan (16:00-18:00)	
		Continue discussion Prepare for reports that will be presented to everybody on Friday morning
	Dinner, discussion and stargazing (18:30)	
	3 3 7	
Day4 morning	Breakout session reports (9:00-10:30)	
Friday, Oct 6th		Reports based on Thursday's discussions
	Coeffe (10:30-11:00)	
	Summary and to-dos (11:00-12:30)	
	Lumph (40:20 44:00)	
	Lunch (12:30-14:00)	
	Departure to Tucson (14:00)
